From the tree stand to the shooting mat, the 6.5 Creedmoor from Fort Scott Munitions™ boasts unparalleled ballistic performance. Our lead free Tumble Upon Impact™ (TUI™) design leaves devastating wound channels resulting in clean, ethical kills, and our CNC machined Solid Copper Spun (SCS®) bullets are guaranteed to hit your target time and time again. Whether you're out waiting on a 200 inch deer to walk by your stand, or competing for first place in a PRS match, our multi-purpose 6.5 Creedmoor ammunition is guaranteed to hit right on the mark.

Unrivalled Performance

Our multi-patented Tumble Upon Impact™ (TUI™) design was built with the hunter in mind. The projectile is designed to punch through hard objects such as bone, but once it comes into contact with soft tissue, it begins tumbling immediately resulting in massive wound channels. The hydro-static shock caused by the tumbling projectile is enough to disrupt and/or shut down surrounding organs, providing you with a clean, ethical kill.

Ballistic Excellence

When you need to really reach out and touch something, our CNC machined, Solid Copper Spun (SCS®) bullets are right on the mark. Each projectile is individually machined out of solid copper bar stock. When loaded, these rounds are guaranteed to be within + or -.2 of a thousandth, giving you the quality of hand loaded munitions inside a factory round. When you only get one shot, make sure yours is on the mark with the 6.5 Creedmoor from Fort Scott Munitions™.
